24 Hour Hotshot Service Anywhere in Western Canada

DELIVERY POINTS

Company Overview

Total Transfer was established in 1999 with a goal of providing premium freight service to oilfield supply companies not available by large L.T.L. carriers. We have since grown to become a fleet of more than 50 trucks based out of Lloydminster, Edmonton, Bonnyville and Calgary. We also offer gathering and warehousing services out of our Lloydminster and Edmonton locations as well as full load service to and from ANYWHERE in Western Canada.

Mission Statement

We strive to anticipate, meet and exceed our customer's needs, wants and expectations!

Dedicated Truck Services

In most cases the same driver that services a particular lane will pick up and deliver the freight for that customer. By eliminating extra handling, lost and damaged freight is seldom an issue. If there are questions or concerns they can be dealt with immediately.

Service

The owner operator in charge of a particular lane is personally responsible for the customer's satisfaction and his profits rely on his customer's success.

Competitive Advantages for our Customers

Increased Sales: When late afternoon orders can be placed and delivery is guaranteed by business opening the next day, our client's customers need not shop around. When customers come in to pick up their orders, they usually make additional purchases as well. Guaranteed delivery aids our clients in allowing them to carry less inventory.

Transportation Costs on Average will Decrease

Emergency late pickups with guaranteed next morning delivery or even same night delivery for L.T.L. rates, rather than hot shot or kilometre charges substantially mitigate overall freight charges.

Expediting Service (Project Management)

Total Transfer Services offers gathering, warehousing and "precisely on time" delivery of your equipment and materials.

Safety

Total Transfer Services maintains a C.O.R. program as well as any customer specific safety requirements and orientations. First Aid, H₂S, Forklift Safety, Load Securement, T.D.G., etc. Total Transfer Services has in-house safety professionals who oversee all required protocols pertinent to the transportation industry and national safety code, including driver certification and training, vehicle inspection and maintenance schedules.

Field supervisors perform ongoing job observations and performance reviews as well as vehicle inspections and driving evaluations. There are clearly defined protocols for dealing with non-compliance and disciplinary procedures.
